Tourism

Tourism is the largest service industry in India. It provides heritage, cultural, medical, business and sports tourism. The main objective of this sector is to develop and promote tourism, maintain competitiveness of India as tourist destination and improve and expand existing tourism products to ensure employment generation and economic growth.

Education :-

The exhibition will be a great networking platform for the World's Best Universities & College Representatives with Indian Students as well as their Parents & Counselors. The Exhibition provides abundant opportunities to explore study in India and Abroad opportunities.

Information & Technology :-

Information Technology (IT) is an example of a general-purpose technology that has the potential to play an important role in economic growth, as well as other dimensions of economic and social development. India is emerging as the hub for "Digital Skills". The country spends \$1.6 bn annually on training work force in the sector. The industry is the largest employer within the private sector, employing 3.9 million people. India is transforming into a digital economy with over 450 mn plus internet subscribers.

Science & Technology:-

Science and Technology have always been an integral part of Indian culture. Natural philosophy, as it was termed in those ancient times, was pursued vigorously at institutions of higher learning. The Indian Renaissance, which coincided with our independence struggle, at the dawn of 1900s witnessed great strides made by Indian scientists. This innate ability to perform creatively in science came to be backed with an institutional setup and strong state support after the country's independence in 1947. Since then, the Government of India has spared no effort to establish a modern S&T infrastructure in the country. The Department of Science and Technology plays a pivotal role in promotion of science and technology in the country. This section offers detailed information pertaining to scientific education and scientific research & development. Details of policies, schemes, documents and programmes for scientists, researchers, scholars, students, etc. are also available.

Health:-

These exhibitions serve as a platform to disseminate knowledge about preventive measures, clinical features, investigations, and treatment options of diseases, as well as raise awareness about health facilities and various career options in the health sector. Expos offer a platform for companies and organizations to display their new products and services to potential customers, network with peers, and gain industry insights. They are usually held in convention centers or exhibition halls. Exhibiting at conferences is a great way to meet with potential customers & learning more about the industry. Attracting an increase in clientele and sales numbers or getting some face time with industry leaders & experts are just a few ways exhibiting at health conferences can be an ideal opportunity for you.

Banking Sector :-

The banking sector in India plays a pivotal role in the country's economic development and financial stability. It serves as the backbone of the financial system, performing several critical functions. The commercial banks provide the required financial support and Infrastructure for both internal and external trade, India is expected to be the fourth largest private wealth market globally by 2028. India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial service firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operative, pension funds, mutual funds and other smaller financial entities.

Energy & Natural Gas

With the pace of development speeding up there is growing demand for various petroleum products including CNG & LPG which are ecofriendly fuels. The state Government is also promoting, developing and implementing non-conventional, renewable and alternate energy devices and technologies. And also taking concrete steps for conventional energy conservation measures in industries, commercial establishments and domestic sectors. The government is also promoting use of clean gases for maintain the ecological balance of the environment. The share of petroleum products and natural gases in the total energy consumption has been increasing over the years, and also working in installing demonstration power projects with own investment to instill confidence in new entrants and private investors. Natural Gas is one of the most favored sources of energy due to its properties as a clean and environment friendly Fuels. The main objective is to disseminate information and public awareness through training programmes, publications, exhibitions, seminars and conferences, and also to ensure the quality of consumers' superior quality at reasonable rates and to overcome the shortage of power in the state.

Environment, Forest and Climate Change:-

The Natural resources such as lakes, rivers, forests, wildlife, etc. have a pivotal role in Indian lifestyle but growing population of the country is increasing pressure on environment. The primary concern of the government is to implement policies and programmes for conservation of the ecosystem, natural resources, welfare of animals and prevention of pollution etc. Expos and exhibitions are natural mediums to highlight initiatives taken by the government and various organizations for conservation and protection of flora and fauna, forest and wildlife, and for control of pollution.

Power & Renewable Energy:-

India is the third largest producer of electricity in the world. During the fiscal year (FY) 2022–23, the total electricity generation in the country was 1,844 TWh, of which 1,618 TWh was generated by utilities. This 3-day event in Goa, India provides pathways for power sector companies to transition their businesses by increasing their understanding of changing trends, strategies and technologies, while connecting buyers and sellers and is the leading force in delivering a platform for the power industry. Catalyst for Development: The power and energy sector drives the growth of industries, agriculture, and domestic needs, highlighting its importance in India's economic development.
